Environmentally friendly mobility with natural gas drives

- **With an average 39 percent market share, MAN is the market leader in natural gas-powered buses.**
- **Biogas allows virtually CO₂-neutral operation**
- **MAN has over 70 years' experience with natural gas engines and currently offers the market's most extensive portfolio of natural gas buses**

Advancing urbanisation, increasing pressure on transport systems, air and noise pollution in cities and climate change all require sustainable solutions for urban mobility. As such, in addition to supporting electric mobility, MAN also relies on a broad spectrum of natural gas vehicles that will continue to undergo further development - as they have for over 70 years, with MAN launching its first natural gas-driven bus in 1943.

Clean travel – CNG buses from MAN

MAN Truck & Bus has been Europe's unchallenged leader in natural gas buses, currently holding a 39 percent market share. Over one fifth (22 percent) of the city buses sold by MAN in the past year run on CNG. For example, the Hungarian cities of Kaposvar and Miskolc recently opted for 40 and 75 MAN Lion's City CNG buses respectively.

The natural gas drive is an alternative to the conventional diesel engine that significantly outperforms the current stringent emissions standard without the need for any additional filtering technology or fuel. With no need for technical modifications, such buses can also run on treated biogas, thus making operation virtually CO₂ -neutral. MAN currently offers the widest portfolio of natural gas buses on the market, with solo and articulated buses in 12 m and 18.75 m lengths and in low-floor (LF) and low-entry (LE) versions.

MAN Truck & Bus is one of Europe's leading manufacturers of commercial vehicles and supplier of transport solutions, with revenues of approximately €9 billion a year (2015). The product portfolio includes trucks, buses and diesel engines, as well as services related to passenger and cargo transport. A subsidiary of Volkswagen Truck & Bus GmbH, MAN Truck & Bus employs more than 35,500 people worldwide.

Working together with its cooperation partner, "Zukunft Erdgas", MAN is advancing integrated natural gas solutions and increasing the number of natural gas buses in operation, as well as ensuring the continued development of the fuel infrastructure for the entire natural gas mobility industry. The "Bus of the Year 2015" award is just one indication that MAN stands at the very forefront in the field of CNG. In receiving the award, the Lion's City GL CNG was particularly recognised for its environmentally friendly, powerful and economical drive.
